Crosstex Dentapure 365 day Bottle Water Cartridge

SKU# DP365B10

- Installs onto your unit's existing water bottle pickup tube via included quick-connect fitting.
- 1 installation provides 365 days (or 240L of water if usage records are kept) of safe, compliant dental unit water
- Can use either tap or distilled water
- Once installed, no monitoring/shocking protocol is required
- Cartridge reduces bacterial exposure by eluting non-allergenic, elemental iodine into dental water
- Change every 365 days, or 240L of water
- Crosstex reminds you when it is time to replace your cartridge

3+1 Net\$257.37

Crosstex Dentapure 365 day Municipal Water Cartridge

SKU# DP365M10

- Easily adapted for installation onto incoming waterlines plumbed directly to city water via included poly-flo fittings.
- 1 installation provides 365 days (or 240L of water if usage records are kept) of safe, compliant dental unit water
- Once installed, no monitoring/shocking protocol is required for the life of the cartridge
- Cartridge reduces bacterial exposure by eluting non-allergenic, elemental iodine into dental water
- Change every 365 days, or 240L of water
- Crosstex reminds you when it is time to replace your cartridge

3+1 Net\$257.37

Crosstex Dentapure Iodine Test Strips Box/50

50/1.Bottle

SKU# DPTEST

- Test strips may be used to verify adequate levels (higher than 0.5 ppm) of iodine release
- These tests strips are only to be used to determine the level of IODINE present in Dental Unit Waterlines (DUWL's), and cannot be used to measure the presence of Colony Forming Units (CFU's). Crosstex recommends checking the iodine level at 11 months, or as you approach 240L of water, to ensure that the iodine output has not fallen below 0.5ppm – particularly if you have a very busy practice.

\$36.93

Micrylium Lines 5 L Bag in Box

5 L Bag / Box

SKU# 03BLUE005

- LINES is a full strength ready to use maintenance product for potable water systems. Designed for use with dental unit waterlines and other water systems with narrow bore polymer tubing and mixed metal components.
- Reduces bad tastes
- Extends the life of equipment
- Non-Toxic / Non- Corrosive
- Can Be used for "shocking" and regular cleaning
- 5L Eco PACK (Bag)

- State-of-the-art TruePress™ technology ensures seal integrity with an extra-wide self-adhesive strip for an airtight seal. High-quality medical-grade paper maximizes steam penetration. Multivariable process indicators on the pouch respond to time, temperature, and steam levels. Tinted film aids in detecting pouch damage, while a thumb notch allows sterile contents to be opened without contamination.

- Self-sealing sterilization pouches made from high-quality materials to deliver reliable sterilization processing at an affordable price. Dual (internal/external) steam indicators provide reliable confirmation of sterilization.

Coltene S.P.E.C. 3 Kit United States, Plug Type A, 1 pc

SKU# 60013941

1 UNIT

- Curing Lights
- Performance without compromise
- The S.P.E.C. 3 curing light defines performance without compromise. Chair time can be effectively reduced due to rapid and deep polymerization on various light cured materials. The sealed aluminum body ensures quick and easy disinfection between patients. The powerful Lithium Polymer Battery offers enough storage capacity to perform over 300 ten-second cures between charges. The Coltene S.P.E.C. 3 features multiple curing modes for maximum functionality in any clinical situation.
- Multiple modes:
- Standard Mode: Ideal for most composite curing scenarios.
- 3K Mode: For rapid curing when time is an issue, like pedo or patients with gag reflex.
- Ortho Mode: Cures an entire full-arch of brackets with 2 three second intervals per bracket.
- Cures 2 mm deep in one second
- Ergonomic lightweight design
- Three distinct power modes

Coltene Coltolux Comfort Kit LED Curing Light

SKU# 60034390

1 UNIT

- 20 Second Curing Cycles
- Power your procedures with a battery that lasts, offering up to 120, 20-second curing cycles on a full charge. Its 11mm curing diameter ensures a consistent and dependable curing process. Crafted with durable materials, the Coltolux Comfort is a breeze to disinfect, ensuring the utmost safety for your practice. Choose Coltolux Comfort—where innovation meets comfort.
- Anti-roll rubber feet
- User-replaceable battery
- Non-contact inductive charging is durable and protects against corrosion
- Large 11mm lens diameter creates homogenous beam profile, for uniform curing over entire surface
- Low-profile head with 90-degree bend, allowing for easier access when working in posterior regions
- Lightweight and ergonomic

Additional Features

30% lighter than the Coltolux LED

The intraoral light shield is specially designed to allow placement of the lens flush with the curing plane

Minimum of 120, 20-second curing cycles with fully charged battery

Charger base includes integrated light ring to provide a clear indication of charge status, regardless of base orientation

EMS Biofilm Discloser 72x Individually wrapped swabs

GBT aims to eliminate biofilm in 50/Box hard-to-reach areas. Visible biofilm allows for quicker removal with GBT. Color removal indicates biofilm removal, including on soft tissues. Users of traditional methods may avoid disclosing biofilm due to time constraints. A report indicated that conventional methods only remove 50% of biofilm in challenging areas. Visible discoloration can encourage better patient homecare (OHI).
